About Our Building

We are located in historic downtown Pensacola. Situated across the street from the famous Seville Quarter and right on top of the former Old Fort Pensacola, our building is surrounded by the base of the fort's walls. Ours is a true brick building, unlike most others, which have only a brick veneer. Just outside our back door in 1821, Andrew Jackson came to lower the Spanish flag and raise the stars and stripes, signifying Florida's incorporation into American territory.

Since its construction in 1905, our location has been home to a bakery, a paint shop and an office supply company among other things. We are proud to be a part of the rich history in downtown Pensacola.

Roger and Cole working hard in their new office

GBCI has expanded and now has a second office. The new office is located in West Mobile at 6300 Piccadilly Square Drive, Suite C. Mechanical Engineers Roger Smith, PE, and Cole Osburn, EIT, are working at our new location. You may use the same phone number, (850) 453 – 6630, and fax number, (850) 453 – 6612, to reach Roger and Cole.

We value all of our clients and hope the new office will serve as a more convenient location to those of you living and working closer to the Mobile area.

Corporate Philosophy

We strive to provide exceptional customer service and engineering excellence with an honest and trustworthy team of engineers in an innovative atmosphere. We aspire to continue to grow to accommodate a broader range of consumer needs while maintaining a personal connection with each valued client.

Gulf Breeze Consulting, Inc. is ready and able to serve all your needs for professional consulting engineering services for commissioning and in the HVAC, electrical, plumbing and fire protection design disciplines.

Alicyn Booth and Allison Simpson

On a Personal Note...

This fall, our office manager Allison will move to St. Petersburg, Fla., to start her first semester of law school. After spending almost a year at GBCI, she said, "I will miss all the guys, but I am excited to pursue this new academic opportunity. I am leaving the guys in good hands."

Alicyn Booth (yes, another Alicyn!) will be the new office manager. Alicyn graduated from the University of West Florida with a bachelor's degree. She said, "I'm excited to begin working with a great group of talented people in such a beautiful location. Although Allison will be sorely missed, I'm very much looking forward to my future with GBCI."

Camp Shelby Deployment Processing Center

The 28,390-square-foot facility is designed to reduce the time required to process deploying personnel and equipment to theaters around the world. The facility is designed for 400 deploying soldiers plus personnel and equipment utilized in military operations deployed by air. The facility consists of logistic plans offices, a troop waiting hall, showering facilities, a truck loading bay and inspection areas. The facility will utilize the latest technology in energy reduction, including energy recovery ventilators, demand control ventilation, lighting controls and solar water heating.
